Local business triumphs - again

Solar Professionals appointed to second Local Government Procurement Panel

Commercial solar experts, the *Solar Professionals*, has achieved another major Government panel placement - their fourth in just over 18 months. The Wagga Wagga based business has been appointed to the Local Government Procurement Energy Services Panel, as a prequalified supplier of solar PV and battery storage.

In 2018, they were appointed to the Local Government Procurement Solar Power Purchase Agreement (PPA) Panel, as well as the New South Wales Government PPA and Energy Solutions Panels.

“We’re the only regional New South Wales based approved contractor. It means we can work across all methods of delivery for Solar PV and Battery Storage in the NSW local Government sector. We’re really proud of this achievement,” said *Solar Professionals* Managing Director, Andrew Meurant.

“Our appointment also means we can offer both Solar Power Purchase Agreements & capex investment solar projects. This equals efficiencies, ease and consistency for Agencies.

Solar Professionals was among 10 panel members from across NSW chosen to provide services across Energy Performance Contracts, Energy Design & Implementation Services, Lighting & Lighting control and Solar PV and Batteries Storage.

For Local Government Agencies interested in finding out more, please phone 02 6925 6056 or email andrew@solarprofessionals.com.au.
